Watermill Express® Continues to Help the Environment, Adds the Prius to its Fleet of Vehicles

Brighton, Colo. – March 5, 2009 – Watermill Express, the nation's largest drive-up vendor of pure drinking water, has added 16 Toyota Prius' to its nationwide fleet of vehicles.

The change to the Prius will save an estimated 130.56 cubic tons of carbon per year from entering the atmosphere. This reduction in carbon emissions is an extension of the commitment Watermill Express has made to being a leader in applying and promoting environmentally friendly practices.

With its dedication to daily service of its units, Watermill Express knows that the fuel economy of standard vehicles is at its worst during urban driving and air quality is a great concern in most of its markets. Adding the Prius to its lineup will significantly improve fuel economy, in turn improving air quality throughout the country.

About Watermill Express:

Watermill Express is the nation's largest provider of drive-up, pure drinking water. Founded 25 years ago in Brighton, Colorado, the company serves over 100,000 customers daily in the existing 1,200 corporate and franchised locations. Customers supply their own containers and purchase one, three or five gallons of water for an average price of 35¢ per gallon. This is a savings of nearly 95% when compared to a typical 20 oz. bottle of water selling off-the-shelf at \$1.00 per bottle.

Watermill Express is an environmentally friendly alternative to pre-packaged water. By promoting reusable containers, the company has prevented the waste of an estimated 500 million disposable water bottles.

As the innovator of the drive-up pure drinking water concept, Watermill Express is the first in the nation to utilize a daily 29-step quality control checklist, surpassing even the most rigorous state inspection requirements. The company has operations in nine states and is currently offering franchise opportunities in ten additional states.
